***CORPORATE PROFILE***

## Lami Corporation is Evolving

The economic conditions, the ways companies should be, these are changing every day. The environment that surrounds us always demands we evolve.

COVID-19 has raged and there have been many things that have not gone as we had hoped. However, as an owner of a company, there have been more things that I could learn from, and it definitely made me grow as a person.

"When I am in trouble, it is time to return to the basics."

That has been my answer and belief. Situations both good and bad always have an end.

Because we are in such an age that everything changes fast, we need to keep an eye on every business and create one possibility - Especially in the Fully Automatic Laminator market, we

continue to challenge ourselves to be "World's No.1 market share".

I believe that what we need to achieve a "100 year company" is everyone's satisfaction. That is also in our management philosophy. To make everyone feel fully satisfied, we have to be a company that is trusted and anticipated by people.

For that, we pursue quality products without compromise, maintain a ready stock, and provide maintenance services. Additionally, we develop new products and share practical information. I also believe that a really important thing is not only improving the products and services, but also each and every employee of ours working sincerely with our stakeholders.

We aim to be a company/people who are appreciated by everyone, through improving our charisma.

CEO Yohei Kishida

Company Goal : All employees become happy fairly

Company Policy: Charisma - Be a person/company who is appreciated by people.

Management Philosophy: 4 Satisfactions

1. Satisfaction of Employees
2. Satisfaction of Customers
3. Satisfaction of Suppliers
4. Satisfaction of Lami Group

We serve society with the 4 satisfactions, aim for the eternal development of the company, and devote ourselves to business activities day by day.

# CHANGE and CHALLENGE

## By the "know-how" cultivated in Japan, we challenge the world.

As an important growth strategy for us to aim to be a 100-year company, we established the Global Business Division in 2014. Also, we have been promoting the sales of the Fully Automatic Laminator, LAMI Revo Series.

It will soon be 15 years since we first launched the LAMI Revo Series, and its capabilities and functions have improved significantly compared to its initial release. We have received praise from our customers all over the world, and we are confident that our technology and products are things that are appreciated worldwide.

In 2018, we established LAMI EUROPE B.V., and we have been developing businesses centered on European countries.

By the "know-how" cultivated in Japan, we will continue to go forward to be the "No.1 Automatic Laminator Company" in the world.
